

COLORID CLOUDSUITE SOLUTIONS

With over 24 years of experience, ColorID's dedicated account managers provide seamless communication and service to our customers. Our consultative team approach includes experts in engineering, design and new technology implementation. Whether you are looking to update your current identification process, or want to transition to issuing mobile credentials, ColorID offers it all.

We are excited to share multiple Cloud-Based solutions for identification management, secure issuance, photo upload and visitor management. Set up a virtual meeting and demonstration with ColorID as we explore these Cloud-Based products and solutions that will provide your institution with significant cost savings and a clear roadmap to technology adoption and vendor independence. Our goal is showing our customers how to maximize your card office efficiency and streamline the production and management of credentials (both physical and digital).

ID MANAGEMENT

Learn more about the next generation of ID card management - with a solution containing advanced features for easy enrollment and credential management. Built for the cloud from day one, it scales to meet your organization's growing needs.

SECURE ISSUANCE

Interested in the next generation of identification solutions for your ID Office? We can show you how to implement a centralized and secure cloud issuance solution. Eliminate the need of pairing desktop computers with your badge printers.

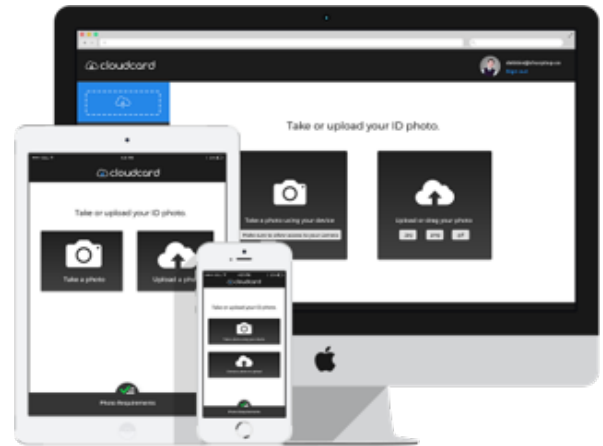

HID® FARGO® Connect™

PHOTO UPLOAD

Don't let the long lines at your card office get in the way of your operations. Give people in your organization the freedom to snap a selfie and sign their cardholder agreement from the control of their phone, tablet, or computer.

VISITOR MGMT

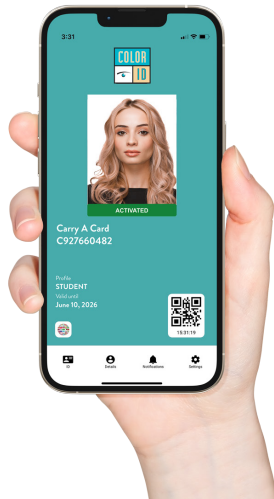

Working with your existing infrastructure, the JRNY suite of cloud services and mobile apps allows you to know who is on premise in real time with a safe and secure visitor management system. Instant notifications of visitors' arrivals or if they do not meet conditions for entry.

MOBILE SOLUTIONS

1. *Flexibility*
2. *Affordability*
3. *Secure*
4. *Open Connectivity*

- Open platform that issues and manages mobile credentials.
- Evolve as technology and industry move to the future.
- Move at your own pace, as your budget allows.
- Connect to third-party systems using standard APIs, connectors, and webhooks.
- Launch rapidly through built-in configurations.
- Expand! ColorID Mobile can provide full identity management, including ID cards.

BIOMETRIC READERS

ColorID specializes in biometric access control and can help identify what type of biometric reader is right for your organization. We carry several types of biometric readers including fingerprint recognition, iris cameras, and vein recognition.
