SECURE CLOUD-ENABLED CARD ISSUANCE

HID®

HID® FARGO® Connect™

CENTRALIZE, OPTIMIZE, AND SECURE YOUR ID CARD ISSUANCE OFFICE.

- **Streamline Card Issuance** - Simplifies management and delivery of cards to save money and time.

- **Seamlessly Integrate** - Easily integrates with one-card and access control software, databases and card technologies.

- **Superior Data Protection** - Gives administrators full system visibility and control while encrypting transmission and storage of data.

HID Global's FARGO Connect™ is a revolutionary way to issue ID cards, campus cards, and other secure credentials — both physical and virtual.

HID FARGO Connect brings together all of the elements of a card issuance program into a centralized integrated system. By combining hardware, software, consumables, and services, the solution simplifies the operation and support of a high volume ID card issuance office while increasing control and security.

Through a secure cloud-based platform, HID FARGO Connect does away with the old paradigm of stand-alone card printers tied to dedicated PC workstations. The platform ensures security while also providing the simplicity and versatility of a web-enabled issuance solution.

Now, cards can be issued from anywhere and from any device via a web interface. Credential management becomes a centralized function that gives control and visibility to the administrator while eliminating the need for the management of software and other IT resources typically required for card issuance.
Through its seamless interface with one-card and access control providers such as CBORD and Quantum Secure, the user can create new cards, encode data, issue replacements, and manage print queues all in one trusted system.

HID FARGO printers now become smart, secure, web-enabled printers capable of leveraging all of the functionality of the platform. Card printers can be installed anywhere, including remote offices and satellite campuses and cards can be sent to any of these printers.

For moments of peak demand, large batches of cards can be produced and mailed by our commercial printing bureau to minimize staff time wasted waiting for cards to print locally.

All of this is delivered through an annual or monthly-billed managed service model that allows organizations to remove themselves from managing the technology, cut multiple layers of program costs, and easily scale the card office to accommodate future technology or volume demands.

The card office has been re-imagined with HID FARGO Connect.

CLOUD-BASED PRODUCTION FEATURES

- Eliminates dedicated PC for printing
- Design cards, capture data, and print anywhere from any device
- Web-based printer maintenance and diagnostics
- Automatic software, firmware and help screen updates
- Interfaces with popular access control and one-card systems from providers such as CBORD and Quantum Secure
- Includes secure high-volume and overflow printing option through HID Card Services
- Centralizes administrator control of remote printers and keys
- Auto-replenishment of consumables
SECURITY FEATURES

- End-to-end encryption of all sensitive data (in transit and at rest)
- Card data remains encrypted until it is printed
- Encryption keys are securely stored in tamper-proof hardware
- Asymmetric encryption ensures that only the intended device can access the card data
- Meets strictest federal and financial institution security requirements such as FERPA, HIPAA and PCI

FUTURE-PROOFING FEATURES

- Compatible with today's most popular card technologies and easily upgradeable for tomorrow's
- Designed to accommodate issuance system growth and reconfiguration as your needs change
- Includes printer smart card encoder/reader upgrades for migrating to technology (RFID) cards
- Supports issuance of both physical credentials and virtual credentials, such as HID Mobile Access

COMPATIBILITY

- CBORD CS Gold
- CBORD Odyssey
- Quantum Secure SAFE
- HID® FARGO® DTC5500LMX and HDP5600 card printers
- HID Card Services
- HID Cards and Credentials
- Magnetic Stripe, Prox, iCLASS, MiFARE, DESFire, Seos
